

The Better Student App

CREATED BY “THE COMPUTER SCIENTISTS”

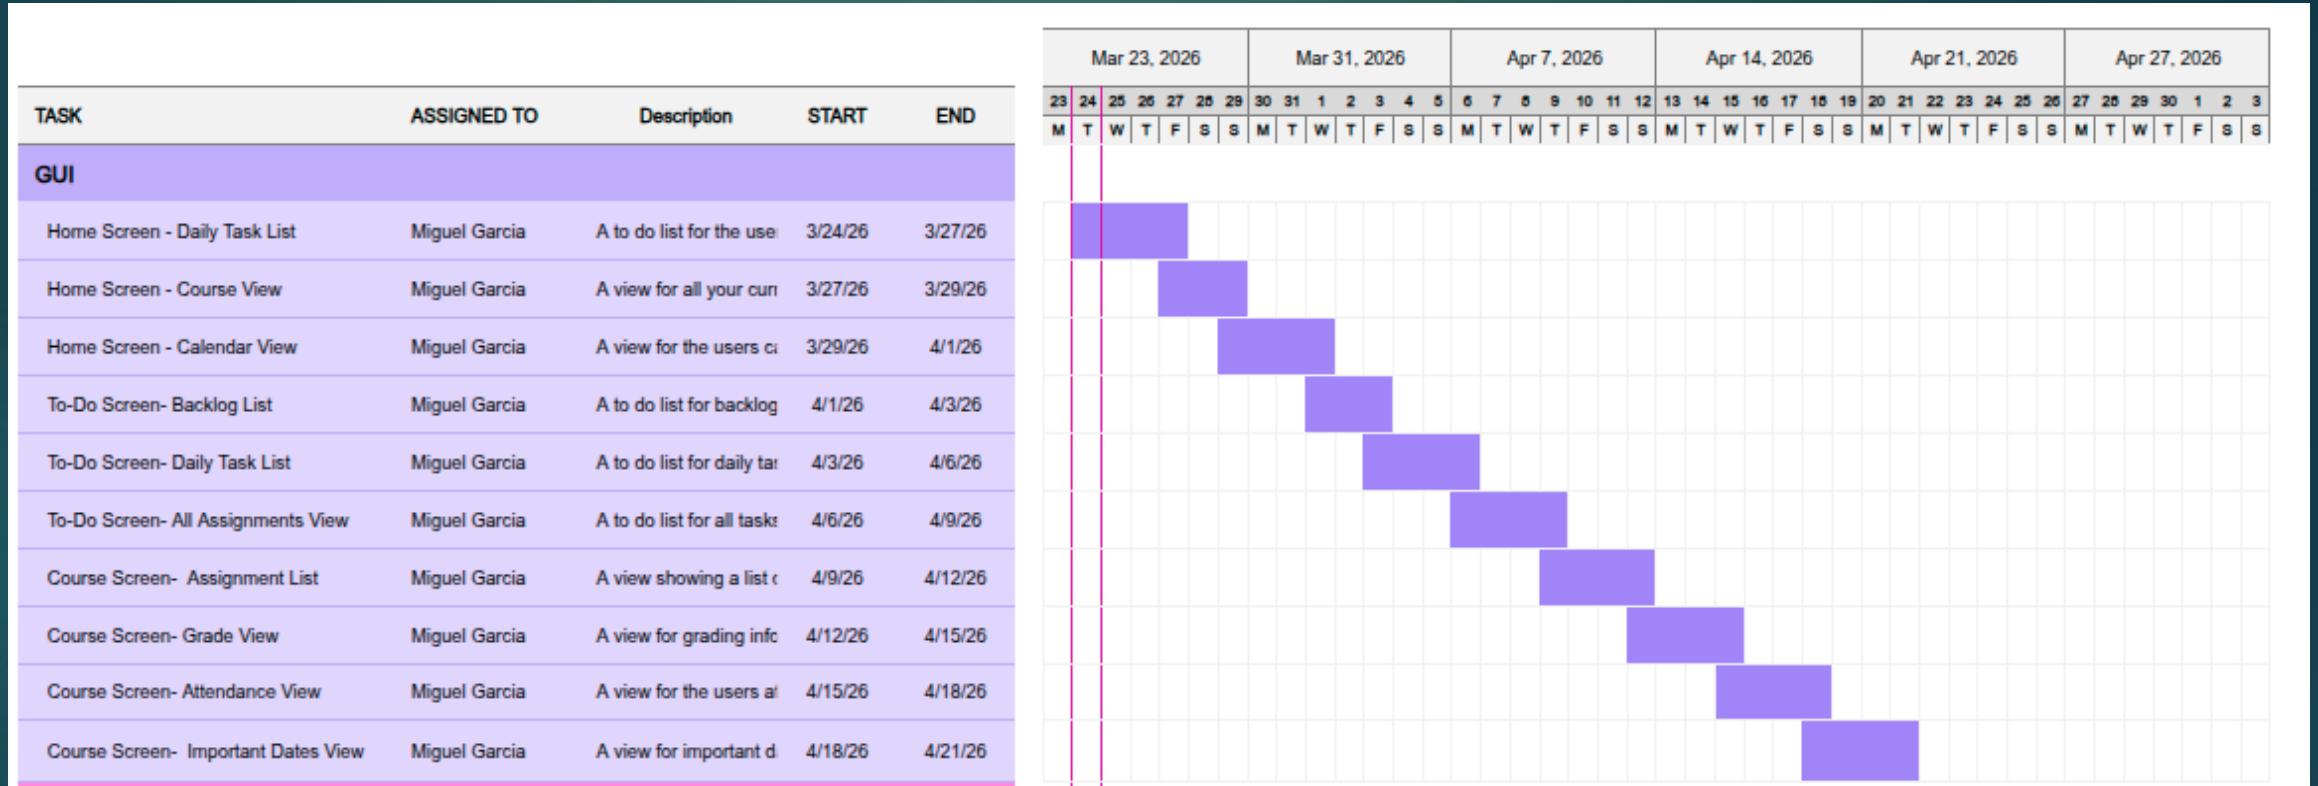

Executive Summary Reminder

Our project's goal is to be a lightweight academic organizer application for college students. The main aspects of our app will be to manage important class information, upcoming assignments, and grades. Our project is important to help college students stay on top of their workload. Our tool can help students reduce stress and improve organization.

Design Mockups Reminder

Work Performed (GUI)

Work Performed (Backend)

Grades and Attendance					
Current Grade Calculator	Rich Becker	A calculator that lets the student their current grade, according to the scores put in.	3/24/26	4/7/26	
Final Grade Predictor	Rich Becker	A calculator that figures out what score is needed on the final to get the desired grade.	3/29/26	4/12/26	
Attendance View	Rich Becker	A view that lets the student to help track their percentage of classes attended.	4/8/26	4/22/26	
Course View and Assignments					
Courses	Jack Arnold	course and individually show the grades and attendance for the specific course.	3/24/26	4/7/26	
Assignments	Jack Arnold	shows assignments due and puts them into to-do list while keeping them organized by course.	4/7/26	4/21/26	
Others

User Set-Up	Jack Arnold	Asks the user various questions to help set up their app to fit their schedule best.	3/31/26	4/10/26	

The Good and the Bad

WHAT WENT WELL

- ▶ Creating the backend and GUI separately
- ▶ Creating classes that can be implemented into the GUI
- ▶ GUI was aesthetic

WHAT WE STRUGGLED WITH

- ▶ Merging the backend and GUI
- ▶ Understanding GitHub
- ▶ Understanding JavaFX

APP DEMONSTRATION
